

CONTEXTUAL TEXT STYLE TRANSFER

P. Champion, J.-B. Gaya and M. Herrera-Martinez

Sorbonne Université

Motivation & Background	Results	Remarks
<p>Text style transfer consists in the translation of a sentence into a desired style. It encompasses various applications, e.g. sentiment manipulation and formalized writing. Previous work relied mostly on parallel corpora with a sentence-to-sentence learning framework [bahdanau2014neural]. In the studied paper, an approach to perform this task while maintaining the sentence coherent with its surrounding context is discussed; hence the name contextual text style transfer.</p> <p>This poster summarizes the work conducted based on this paper. The section introduces the key concepts and modules used to build the model, and the section</p>
